

Cash Quiz

Try out our newest table game – Cash Quiz! Cash Quiz allows guests to “gamble” with their minds, competing against one another by answering trivia questions to win play money. Cash Quiz is played in two rounds with 2 to 8 Players per game, as follows:

ROUND ONE: (a.k.a. “Individual Speed Round”)

Players bet \$1,000 or \$2,000 per question. After a question is asked Players buzz in – the Player who buzzes in the fastest gets to answer. If they answer correctly they win their bet. If they answer incorrectly they lose the money they’ve wagered and another Player can buzz in to try and answer. Round One is 10 minutes long.

ROUND TWO: (a.k.a. the “Team Speed Round”)

To play the round, Players must each pay \$3,000 to play the round, which will go into the Speed Round Pot. Players are then separated into 2 teams by their buzzer color – the Red Team and the Blue Team. The Speed Round lasts 5 to 10 minutes and the winning Team will get to split the Speed Round Pot. Only the person who buzzes in first has the opportunity to answer the question. If they get it wrong, the other team can confer for 30 to 60 seconds and give a group answer. For each question a Team answers correctly they will win a chip. After the Round is over the Teams will count their respective winnings. The Team that has won the most chips will get to split the whole Speed Round Pot (\$6,000 each), along with each Player receiving \$1,000 for each chip their team has accumulated. The Players on the losing team will each receive \$1,000 for each chip their team has accumulated.

ROUND THREE: (a.k.a. the “Weakest Link Round”)

Players must each pay \$2,000 to play the round, which is then traded in for 2 blue chips. We will begin with easier questions and ask each Player – one by one – to answer them. If they get their question correct, they will win \$2,000. If they answer incorrectly, they will lose one of their 2 blue chips. We will continue to ask Players questions one by one, and the questions will become more difficult as the round goes on. The last Player to have a blue chip left wins \$25,000.

*At the end of Round 3, 8 different guests will be given a chance to play.
If necessary, Guests will roll the dice to win the chance to play.*
