

Horse Wheel

Ten horses are listed on the Wheel – numbered 1 through 10 and there are different odds shown under each spoke of the Wheel for each Horse. The odds start at 2 to 1 and go all the way up to the highest odds of 8 to 1.

Players may bet on as many horses as they desire. The Dealer will spin the Horse Wheel after all the bets have been placed.

The Players win if the number they've bet on matches the "winning" horse on the Wheel. Players will be paid out according to the odds that the pointer has landed on.
